

Subscriptions Management and Tracking App

Abdulwahab Alnemer, Yosef Alhedr

Faculty Advisor(s): Dr. Khaled Slhoub, Dept. of CES, Florida Institute of Technology

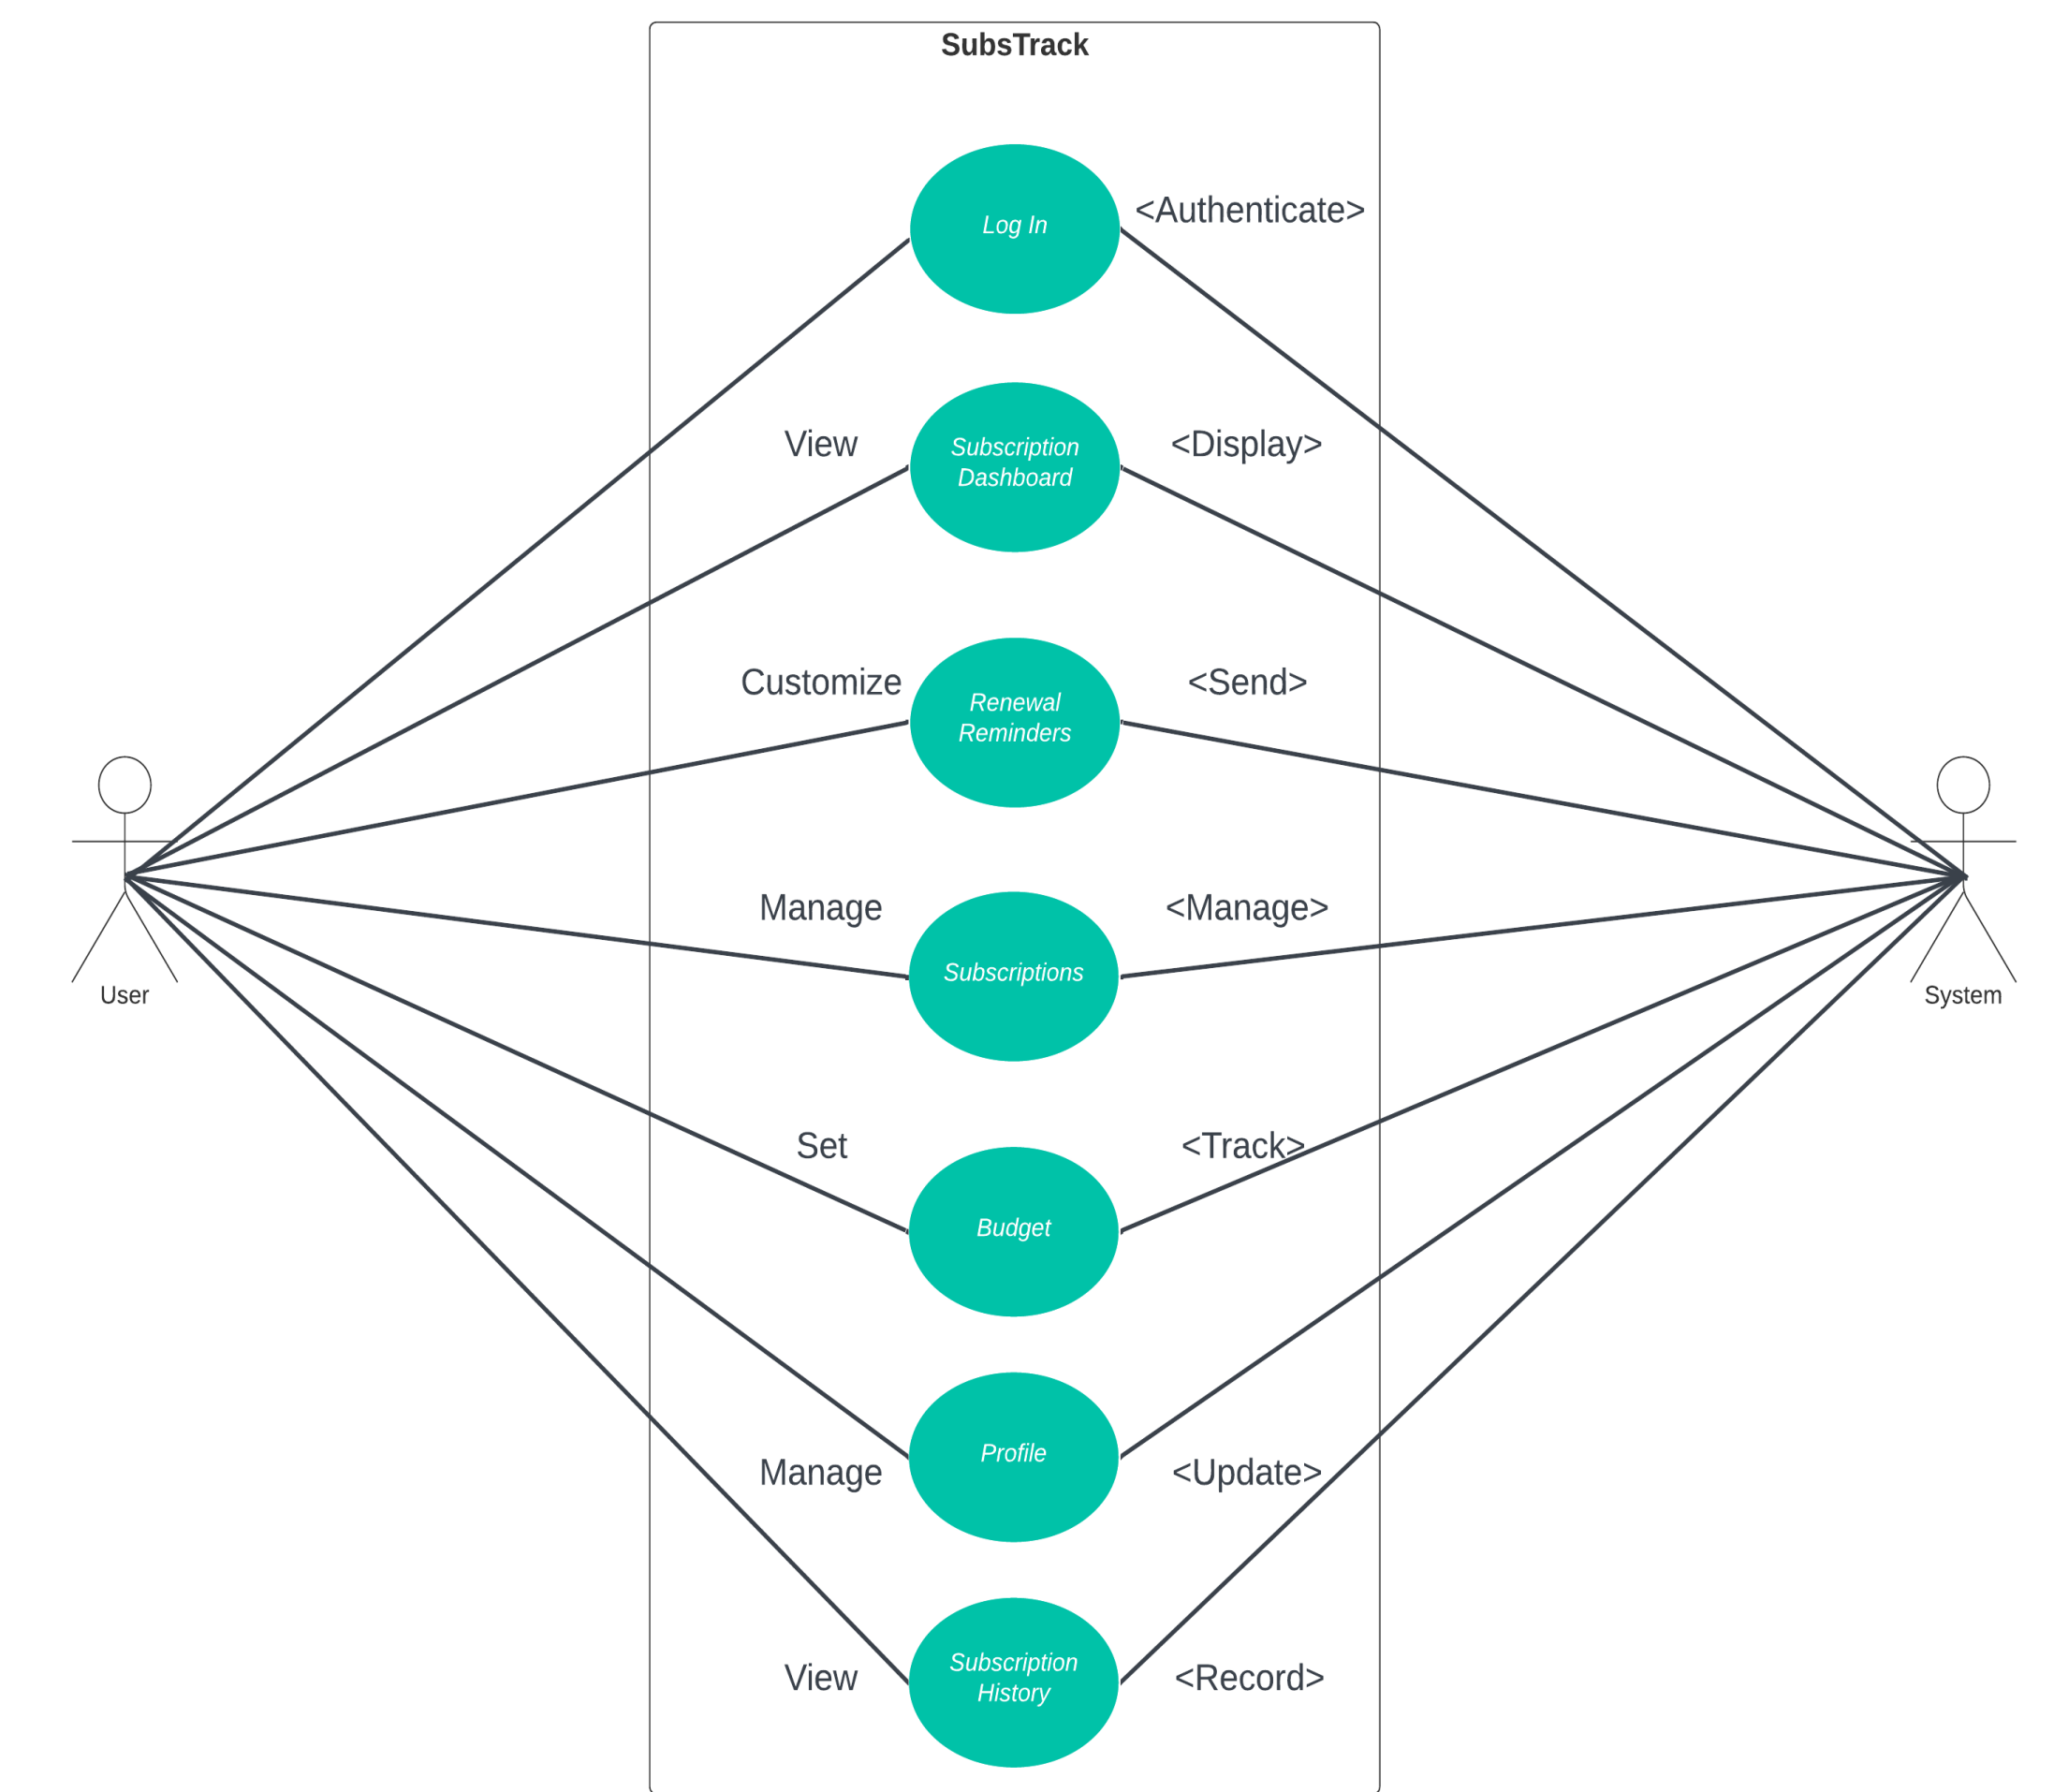

GUI

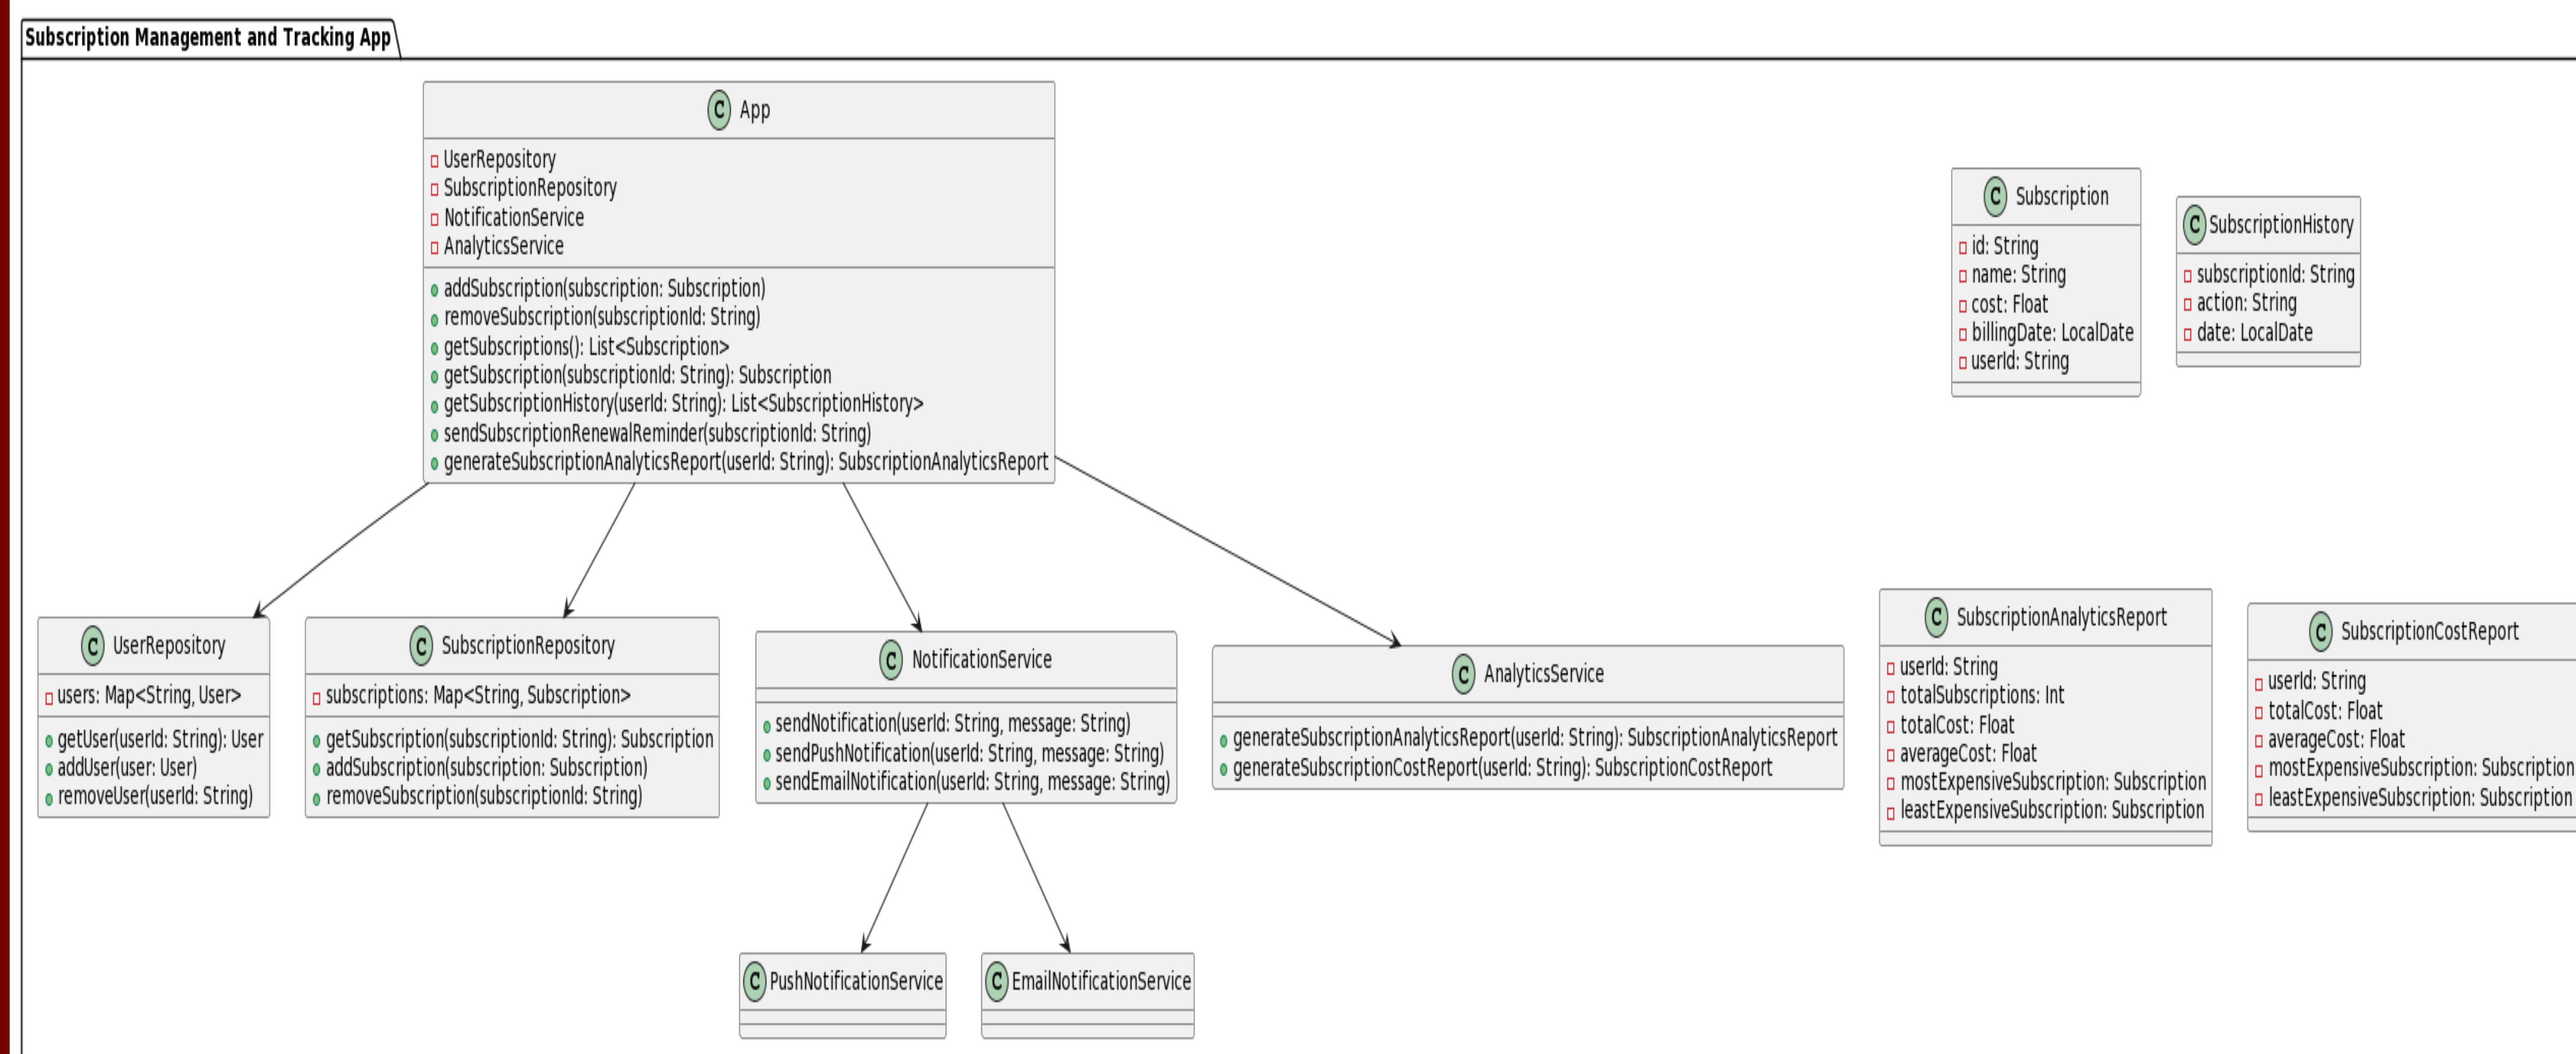

Goal

The Subscription Management and Tracking App aims to simplify and streamline the management of users' subscriptions to enhance their overall well-being and satisfaction. Recognizing the overwhelming number of subscriptions users face, from streaming services to utility bills, the app seeks to address frustrations and financial strain caused by fragmented and unclear management systems. By empowering users to effortlessly manage subscriptions, achieve greater financial control, and avoid unnecessary expenses, the app aims to bring relief and happiness to users.

Design

Architecture

Future Work

* Implementing Adding Subscriptions Automatically

Features

- * Manage Subscriptions
- Track Subscriptions
- Alert users for subscriptions due dates
- Budget features
